Vitorio Biancolini, 780, Sao Mateus do Sul – Parana, Brazil

PROJECTS

Trabalhar em Casa (August 2016 – 1 person project)

- Platform where brazilian companies can post remote job offers.
- Built with Laravel and Stripe subscriptions.
- Users can apply for free, while companies can choose between plans.
- <http://www.trabalharemcasa.pw>

University Manuals (September 2015 – 1 person project)

- Android application that manages the manuals for each course
- Built for University Iguacu Valley using Android Studio
- Users can download the PDF files from a FTP server while the application manages to keep these manuals synchronized with the last version available.
